

2025 EECMS Summer Internship Application Form

Main Supervisor	Shreya Ghosh
Other supervisors (if applicable)	Tom Gedeon
Project Title	Wearable sensors for anxiety
Student location(s) for the project	Bentley campus
Duration of project	Eight weeks
Project Description	Anxiety is a common problem in society and especially for university students. We have prior expertise in the use of wearable and camera based sensors for detecting human internal states. This project would be a pilot study for detection of anxiety.
